- 🛡️ Threat Vulnerability Scanning

Trainings:

- ▶ Cyber Awareness Training
- ▶ Ethical Hacking & Pen Testing
- ▶ Incident Response Workshops
- ▶ Customized Security Training

Consultancy Services

(Gap Analysis, Documentation & Implementation)

● Gap Analysis

Our Team shall perform analysis of documents and records including existing ISO Standard Policies and Procedures along with their supporting forms and formats, and records being kept in hard or soft forms. The documents shall be reviewed and compared with the existing “Practical” setup at customer’s organization to evaluate their effectiveness. We assure that these documents shall be kept in secure manner with confidentiality.

● Documentation

International best practices in relation to ISO Standards require documentation and recording to ensure that all activities are based on a pre-programmed structure and their performance generates evidence against each step (to as much extent as possible). Medmak will provide guidance and support in the development of documents such as Policies, Procedures, Forms, etc. which on one hand provides direction to achieve ISO Standard targets and extensive guidelines to ensure their implementation and enhancement.

● Implementation

The guidance is provided to the client team by the appointed consultant about the newly developed management system during infrequent visits, follow-ups and on job trainings.

INTERNAL AUDIT: The internal audit will be conducted by the client team (Qualified Internal Auditors trained during the training) with the support of the appointed consultant. All developed records will be reviewed and finalized by the consultant.

QHSE Training

Services

● HSE TRAINING CATEGORIES

HEALTH

Programmes covering occupational health management, first aid, CPR, basic life support, health and safety induction, infection control, laboratory safety and heat stress management.

SAFETY

Comprehensive safety training covering risk management, permit-to-work, LOTO, PPE, fire safety, working at height, scaffolding, rigging, lifting & slinging, crane safety, forklift safety, emergency response, excavation safety and defensive driving.

ENVIRONMENT

Environmental awareness training aligned with ISO 14001, covering hazardous material handling, spill prevention, chemical handling and environmental compliance programmes.

● GULF SQAS

Gulf SQAS (Sustainability & Quality Assessment System) evaluates the environment, health, safety, security and quality (EHSS&Q) performance of Logistic Service Providers using standardised modular assessment questionnaires carried out by independent certified assessors. Gulf SQAS helps companies avoid multiple assessments and encourages dialogue between chemical companies and LSPs. It is a key element of Responsible Care® applied to logistics operations.
